EDUCATION

KIET Group of Institutions

B.Tech in Computer Science – Artificial Intelligence Specialization

Ghaziabad, Uttar Pradesh

2024 – 2028

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript

ML / Deep Learning: Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, OpenCV, Pandas, NumPy, Matplotlib

Relevant Areas: Computer Vision, Image Classification, CNNs, NLP, Anomaly Detection, Model Optimization

Agentic AI & LLMs: LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, Tool-Calling, Vector Databases (ChromaDB, FAISS)

Web Scraping: PRAW (Reddit API), Automated Pipeline Development

Tools & Platforms: Git, GitHub, Docker, MySQL

Cloud: AWS

EXPERIENCE

Technical Team Member

2024 – 2025

Uddeshhya NGO

Remote / Ghaziabad

Collaborated with the tech team to design, develop, and maintain the organization's website using modern web technologies. Improved information accessibility for 200+ volunteers and beneficiaries by restructuring content architecture and navigation. Implemented responsive UI changes and resolved bugs, contributing to a measurable improvement in site usability.

PROJECTS

Nocturne.ai | Python, Reddit API (PRAW), XGBoost, Scikit-learn

Feb 2026 – Mar 2026

- Built an end-to-end ML pipeline that scraped 10,000+ Reddit financial comments daily to solve real-time market sentiment analysis challenges.
- Developed a self-retraining sentiment model achieving 86% classification accuracy and reducing manual financial trend analysis effort by 95%.
- Learned production ML workflows, automated retraining pipelines, feature engineering, and adaptive model versioning through continuous data integration.

Argus-AI | Python, Gemini API, LangChain, RAG Architecture

Jan 2026 – Apr 2026

- Developed an autonomous RAG-based AI security assistant over 10,000+ threat intelligence documents to address slow incident investigation workflows.
- Built custom LangChain tools for log parsing, anomaly detection, and automated reporting, reducing security investigation time by 60%.
- Gained hands-on experience with AI agents, tool-calling, vector databases, prompt engineering, and multi-step reasoning systems.

ResMate.ai | Python, FastAPI, NLP, OpenAI API, LaTeX, ATS Optimization

Mar 2026 – May 2026

- Created an AI-powered resume optimization platform that matches resumes with job descriptions using NLP and ATS-based semantic scoring.
- Automated resume customization and cover letter generation, reducing manual intervention by 80% and cutting preparation time from 2 hours to under 10 minutes.
- Learned scalable backend development, prompt engineering, document automation, and real-world NLP optimization techniques using FastAPI and OpenAI APIs.

CERTIFICATIONS

AWS Certified Cloud Practitioner – Cloud fundamentals, architecture, and core AWS services

Samsung IoT Certification – Hands-on IoT systems development and embedded integration

AWS Certified Data Engineer – Core AWS Skills for Data engineering, and data pipelines.
